If FISH (flourescence in situ hybridization) testing is done your insurance carrier will be charged \$927 in addition to the estimated costs above. FISH may not be covered by your insurance carrier. Not all insurances companies will cover the consultation fee. If this not a covered benefit by your insurance company, the fee would be your responsibility.

All specimens are sent to Henry Ford Hospital for analysis. It is your responsibility to inform your insurance carrier that all labs are sent to Henry Ford Cytogenetics only. If your insurance carrier has a specific lab that they use, please make our staff aware of this. Henry Ford will bill your insurance carrier for all tests, but it does not guarantee it is a covered benefit.

The above fees are provided for your information. These are quotes as of February 2010. Prices are subject to change without advanced notice. Please check with your insurance carrier prior to your appointment regarding coverage of all procedures and necessary lab fees. All lab prices are estimated.

I have read and fully understand the above information.
